FICHA TÉCNICA

PRODUCTO: Instant softening treatment

REF:13IB18

FORMATOS: Vial 15 ml, Bottle 250 ml

PEDICURE LINE

DESCRIPCIÓN

Eliminates roughness and calluses easily from the feet without cutting or filing. Painless treatment.

PRINCIPIOS ACTIVOS DESTACADOS

Sodium hydroxide. A caustic product used as a softener. Due to its caustic nature, it should be handled with gloves and contact with the eyes avoided.

Glycerene. An ingredient with emollient and hygroscopic properties. In other words, it absorbs moisture from the atmosphere and transmits it to the skin, softening, hydrating and protecting it.

RESULTADOS

Eliminates the hardness and calluses of the hands without cuts or filings. Softens cuticles to allow removal

MODO DE EMPLEO

To retract cuticles. Cover the cuticles and hard skin around the nails with a small amount on dry cotton wool. Apply a few drops of the product onto cotton wool to saturation level. Allow to work for 3 to 5 minutes before removing the cotton wool and sweeping away the cuticles and softened calluses by means of a spatula. Clean the treated area with a dry nailbrush. Wash with water and once dry, apply a hydrating cream with a light massage.

To remove calluses. Cover the callus with a layer of dry cotton wool. Apply a few drops of the product onto cotton wool to saturation level. Allow to work for 10 minutes, adding a drop now and then to guarantee immediate contact, apply the spatula perpendicularly and press. Sweep the area to remove the softened callus. Repeat this operation however many times necessary to eliminate the callus to a desired level. Once achieved, clean the treated area with a dry nailbrush to obtain a perfect finish. Wash with water and once dry, apply a nutritive cream by means of a light massage.

Warning. Should not be used on the face or on sensitive or damaged skin.

TIPO DE PIEL

All skin types

FRECUENCIA DE USO

Once a week

COMPOSICIÓN

DEMINERALIZED WATER, GLYCERIN, SODIUM HYDROXIDE.
