

**PARAÍSO**  
COSMETICS

# DATA SHEET

**PRODUCT:** Thermal activating treatment

**REF:**13IB13

**FORMATS:** Jar 1.000 ml

**BODY LINE**

## DESCRIPTION

The Paraíso Cosmetics Thermal activating treatment is recommended for both the hard and nodule stages of cellulitis. As a result of its hyperemiation action, the localized sauna effect facilitates perspiration and the elimination of moisture and grease retained beneath the skin.

## FEATURED ACTIVE PRINCIPLES

Fluid retention is a trigger for cellulitis, having an active ingredient therefore capable of reabsorbing this fluid will be very useful in the treatment of this dysfunction.

Centella extract. The centella leaves and flowers have healing and purifying properties. They stimulate blood and lymph circulation and the elimination of waste substances. They favour the synthesis of collagen and proteins. They protect and reinforce blood vessels and as a result restore elasticity to the tissues.

Ivy extract. Extracted from the perennial leaf of a climbing plant. Ivy is well known for its invigorating, astringent and refining properties. Ivy extract has slimming and anti-cellulitis properties, preventing the accumulation of moisture in the surface tissue. Ivy extract is at present being studied for its vaso-constrictive properties due to its vitamin P content. It diminishes tissue sensitivity, activates the circulation and helps reduce localized inflammation.

Horsetail plant. This plant has a long history as an effective treatment for damaged or tired skin. It is used on the skin for its astringent, invigorating and firming properties. It helps cure wounds. It also helps improve skin elasticity. This plant helps eliminate the excess of oil in the skin and hair. It is a coadjutant in the treatment of wrinkled skin.

Methyl nicotinate. An ingredient that contributes both hyperaemic and rubifying properties to the product. It activates localized heat, the effect of which lasts for a few minutes to enhance the penetration of the active ingredients.

## RESULTS

Very suitable for the treatment of hard and nodular cellulitis. Hyperemesis action, it does the sauna effect Local, facilitating the sweating and elimination of water and fat retained at the subcutaneous level.

## HOW TO USE

Apply a sufficient amount to the area being treated, using a light circular massaging movement. Allow to act until hyperaemia is obtained. This warming effect produces a reddening of the skin, which can last for around twenty minutes and is a perfectly normal reaction.

## TYPE OF SKIN

All skin types

## FREQUENCY OF USE

Daily use

## COMPOSITION

WATER (AQUA), PEG-6 STEARATE (AND) GLYCOL STEARATE (AND) PEG-32 STEARATE, PROPYLENE GLYCOL, ISOSTEARYL ISOSTEARATE, OCTYL DODECYL MYRISTATE, HEDERA HELIX, FUCUS VESICULOSUS, EQUISETUM ARVENSE, HYDROCOT E ASIATICA, HYDROGENATED PALM/PALM KERNEL OIL PEG-6 ESTER, ISOPROPYL MYRISTATE, PARAFFINUM LIQUIDUM, MENTHOL, FRAGRANCE, METHYLPARABEN, QUATERNIUM 15, PROPYLPARABEN, METHYL NICOTINATE, BHT, HEXYL CINNAMAL, BENZYL BENZOATE, CITRONELLOL, GERANIOL, HYDROXYCITRONELLAL, EUGENOL, LILIAL, LYRAL, LINALOOL, BENZYL SALICYLATE.
