DATA SHEET

PRODUCT: Anti-wrinkle reaffirming cream

REF:13IB03

FORMATS: Jar 1.000 ml, Jar 500 ml

BODY LINE

DESCRIPTION

Recommended in the prevention and treatment of skins affected by sagginess and other elastic afflictions of the overall tissue. A regular application of the product prevents stretch marks from forming, restores smoothness and elasticity to the skin, increases firmness and hydrates the affected areas.

FEATURED ACTIVE PRINCIPLES

Centella extract. Centella leaves and flowers have healing and purifying properties. They stimulate blood and lymph circulation and the elimination of waste substances. They favour the synthesis of collagen and proteins. They protect and reinforce blood vessels and as a result restore the elasticity of the tissues.

Fucus extract. Fucus contains organic iodine in its thallus, which has the ability to mobilize retained liquid in localized areas of the body, stimulating the circulation and eliminating toxins.

Since fluid retention is a trigger for cellulitis, having an active ingredient capable of reabsorbing this fluid could prove to be very useful in the treatment of this dysfunction.

Horsetail plant. This plant has a long history as an effective treatment for damaged or tired skin. It is used on the skin for its astringent, invigorating and firming properties. It helps cure wounds. It also helps improve skin elasticity. This plant helps eliminate the excess of oil in the skin and hair. It is a coadjutant in the treatment of wrinkled skin.

Ginseng extract. An oriental plant with recognized rejuvenating and regenerating properties, balancing and regularizing the skin's cell activity, which is often low in dry skin types and disturbed in mixed skin types.

Organic silicon. Reconstructs fragile skin and maximizes the hydrating properties of hyaluronic acid and allantoin, two natural components of the skin that diminish in both quality and quantity with age and are responsible for the appearance of wrinkles.

Vitamin F. Its use in cosmetics is based on its qualities for modifying certain skin states, such as dryness, reddening and scaling. The polyunsaturated fatty acids produce invigorating effects, improving the complexion. This product may also be applied to eliminate small folds and wrinkles in the skin.

Pantenol ? Provitamin B5. Has great skin penetration capacity and a strong moisturizing nature. Ideal for applying as an after-sun cream and for light irritations of the skin.

Wheat-germ oil. From a cosmetic point of view, wheat-germ oil is a natural source of vitamin E and is also well known for containing residual lipidic components. It may be applied in anti-ageing formulas for its antioxidant action on

tocopherols, acting on the essential fatty acids of membranes and stabilizing them. It also acts as an inhibitor of free radicals, impeding their action, which in turn helps prevent the oxidizing process of membranes. It also has a regenerating effect on cutaneous tissue due to the presence of unsaturated fatty acids, favouring local circulation and the revitalization of the dermis.

Allantoin. Helps alleviate unfavourable effects of the skin provoked by certain cosmetic ingredients such as detergents, oils and alkaline or acid materials. Allantoin promotes and accelerates the natural healing processes in the body; it helps skin to help itself.

RESULTS

Helps maintain the normal structure of the elastic tissue, prevents sclerosing of the connective tissue and tones and reaffirms skin structure of breasts, belly and buttocks

HOW TO USE

Apply a sufficient amount of cream to the area being treated, using a rotary massage technique until it has been completely absorbed by the skin.

TYPE OF SKIN

All skin use

FREQUENCY OF USE

Daily use

COMPOSITION

WATER (AQUA), PEG-6 STEARATE (AND) GLYCOL STEARATE (AND) PEG-32 STEARATE, COLLAGEN, PARAFFINUM LIQUIDUM, ISOSTEARYL ISOSTEARATE, PROPYLENE GLYCOL, CETYL PALMITATE, HYDROCOTYLE ASIATICA, FUCUS VESICULOSUS, EQUISETUM ARVENSE, PANAX GINSENG, MONOMETHYL TRISILANOL MANNURONATE, F VITAMIN, PANTHENOL, TRITICUM VULGARIS, ALLANTOIN, METHYLPARABEN, FRAGRANCE, PROPYLPARABEN, QUATERNIUM 15, BHT, HEXYL CINNAMAL, BENZYL BENZOATE, CITRONELLOL, GERANIOL, HYDROXYCINONELLAL, EUGENOL, LILIAL, LYRAL, LINALOOL, BENZYL SALICYLATE.
