PRODUCTO: Heat effect gel

REF:13IB20C

FORMATOS: Jar 1.000 ml

MASSAGE LINE

DESCRIPCIÓN

A gel especially recommended for anti-cellulite treatments. Its heat effect activates the peripheral circulation, helping to eliminate cellulitis nodules. It contains reduction vegetable extracts and active hyperemiation ingredients.

PRINCIPIOS ACTIVOS DESTACADOS

Fucus extract. Fucus contains organic iodine in its thallus, which has the ability to mobilize retained liquid in localized areas of the body, stimulating the circulation and eliminating toxins.

Since fluid retention is a trigger for cellulitis, having an active ingredient capable of reabsorbing this fluid could prove to be very useful in the treatment of this dysfunction.

Centella extract. Centella leaves and flowers have healing and purifying properties. They stimulate blood and lymph circulation and the elimination of waste substances. They favour the synthesis of collagen and proteins. They protect and reinforce blood vessels and as a result restore the elasticity of the tissues.

Ivy extract. Extracted from the perennial leaf of a climbing plant. Ivy is well known for its invigorating, astringent and refining properties. Ivy extract has slimming and anti-cellulitis properties, preventing the accumulation of moisture in the surface tissue. Ivy extract is at present being studied for its vaso-constricting properties due to its vitamin P content. It diminishes tissue sensitivity, activates the circulation and helps reduce localized inflammation.

Horsetail plant. This plant has a long history as an effective treatment for damaged or tired skin. It is used on the skin for its astringent, invigorating and firming properties. It helps cure wounds. It also helps improve skin elasticity. This plant helps eliminate the excess of oil in the skin and hair. It is a coadjutant in the treatment of wrinkled skin.

Methyl nicotinate. An ingredient that contributes both hyperaemic and rubifying properties to the product. It activates localized heat, the effect of which lasts for a few minutes to enhance the penetration of the active ingredients.

RESULTADOS

Gel specially indicated for the anti-cellulite treatment. Its active heat effect on the peripheral circulation, helping to Remove cellulite nodules. Contains reductive vegetable extracts and hyper-active ingredients. It is also suitable for massage in physiotherapy.

MODO DE EMPLEO

Apply a sufficient amount every day to the area being treated performing a light rotary action massage.

TIPO DE PIEL

All skin types

FRECUENCIA DE USO

Daily use

COMPOSICIÓN

AQUA, GLYCERIN, PROPYLENE GLYCOL, POLYSORBATE 20, ALCOHOL DENAT, FUCUS VESICULOSUS, HEDERA HELIX, EQUISETUM ARVENSE, HYDROCOTYLE ASIATICA, CARBOMER, TRIETHANOLAMINE, METHYL PARABEN, FRAGRANCE, PROPYL PARABEN, METHYL CHOLORO ISOTHIAZOLINONE METHYL ISOTHIAZOLINONE, NICOTINATE, CI16185, COUMARIN, HYDROXYCITRONELLAL, EUGENOL, LYRAL, LONALLOOL, BENZYL SALICYLATE.
